

SUNTERRESAA SANKAR

CYBERSECURITY | PENETRATION TESTING | AI-ASSISTED VAPT & VULNERABILITY MANAGEMENT

Seri Kembangan, Selangor | 0197007723 | sunterresa@gmail.com

Portfolio: <https://portfolio.sunterresa.workers.dev/>

SUMMARY

Cybersecurity graduate with hands-on experience in penetration testing and vulnerability management at AirAsia, complemented by security monitoring and compliance work at Merchantrade Asia. Experienced in validating findings, prioritising risk, documenting evidence and coordinating remediation. Developer of vapt.console, an AI-assisted platform for vulnerability triage. Technical foundation spans web/API security, Python, Linux, networking, access reviews and CIS Benchmark assessments.

TECHNICAL SKILLS

Security testing: Web/API penetration testing, vulnerability assessment and triage, CVSS v3.1, OWASP Top 10 and API Security Top 10; Burp Suite, Nessus, Nmap, Metasploit

Monitoring and controls: Log monitoring, patch-status tracking, CIS Benchmarks, server-hardening reviews, privileged access management; BeyondTrust, Wireshark

Systems and development: Python, REST APIs, Git, Linux, Docker; TCP/IP, DNS, VPN; JavaScript, React, Node.js

WORK EXPERIENCE

Penetration Tester | AirAsia (K-Youth Programme) | April 2026 - Aug 2026

- Conducted weekly automated vulnerability scans and manual web application testing against production assets, based on active security tickets.
- Validated findings, assessed severity and prioritised vulnerabilities by business impact.
- Coordinated with IT and application teams on patching, configuration fixes and remediation tracking
- Prepared vulnerability reports, maintained ticket updates and tracked remediation KPIs to support visibility of outstanding issues.

Information Security Compliance Intern | Merchantrade Asia | Jul 2025 - Dec 2025

- Reviewed privileged access using BeyondTrust to support access governance and compliance.
- Assessed server configurations against CIS Benchmarks and documented hardening gaps.
- Monitored logs, patching status and security metrics; prepared weekly security reports.
- Supported security governance reviews and audit readiness through compliance documentation and follow-up with relevant teams.

TECHNICAL PROJECT

Vapt.console | Developer | AI-assisted Vulnerability Assessment Platform

- Built a multi-model LLM pipeline to process Burp Suite, OWASP ZAP, Nessus and Nmap outputs for finding validation and false-positive analysis.
- Incorporated evidence grounding and confidential data-handling controls, with attention to prompt-injection risks in LLM-assisted security analysis.

DocuChain | Final Year Project

- Built a document verification application using Ethereum, IPFS, React.js and Express.js; implemented smart contracts, MetaMask login and role-based access, with testing in Ganache.

EDUCATION

Bachelor of Computer Science (Hons.) in Cybersecurity

Multimedia University | Oct 2022 - Dec 2025 | CGPA: 3.60

CERTIFICATIONS AND TRAINING

CompTIA Tech+ | Huawei HCIA-Security V4.0 | Huawei HCIA-AI V3.5

Red Teaming Level 0 Workshop, Oday Academy | Certificate of Participation

K-Youth Development Programme, Khazanah Nasional Berhad | Apr 2026 - May 2026

Languages: English, Malay, Tamil
