

SUNTERRESAA SANKAR

CYBERSECURITY & SOC ANALYST L1 | IT COMPLIANCE & SECURITY ANALYST |
AI-ASSISTED VAPT & VULNERABILITY MANAGEMENT

Seri Kembangan, Selangor | 0197007723 | sunterresa@gmail.com

SUMMARY

<https://phosphor.sunterresa.workers.dev>

Cybersecurity graduate (BCS Hons, Cybersecurity — CGPA 3.60) and practising penetration tester at AirAsia, running weekly vulnerability assessments and manual web application testing against production assets. Builder of vapt.console, an AI-assisted VAPT platform that ingests Burp, ZAP, Nessus and Nmap output and applies a multi-model LLM triage pipeline to separate true positives from scanner noise before analyst time is spent. Practical focus on the security of AI systems as well as security with AI — prompt-injection indicators, evidence grounding to prevent fabricated findings, and data-handling controls for LLM pipelines. Previously performed privileged access reviews, CIS Benchmark hardening and audit-readiness work at a licensed financial services provider. Huawei HCIA-Security and HCIA-AI certified.

WORK EXPERIENCE

Penetration Tester, AirAsia (K-Youth Programme)

Jun 2026 - Aug 2026

- Conducted weekly automated vulnerability scans & manual penetration testing based on active security tickets.
- Validated findings, assessed risk severity, and prioritized vulnerabilities by business impact.
- Worked with IT and application teams to support patching, configuration fixes, and remediation tracking.
- Prepared vulnerability reports, updated ticket status, and tracked remediation KPIs.

K-Youth Development Programme, Khazanah Nasional Berhad

Apr 2026 - May 2026

- Selected for a national talent development programme focused on industry readiness and professional growth.
- Gained exposure across cybersecurity, governance, technology, and business environments.
- Completed structured training, workplace assignments, and career development activities.
- Collaborated with professionals and peers in fast-paced project and learning environments.

Information Security Compliance Intern, Merchantrade Asia

Jul 2025 - Dec 2025

- Performed privileged access reviews using BeyondTrust to support secure access governance.
- Assisted with IT compliance checks, security governance reviews, and audit readiness activities.
- Conducted CIS Benchmark and server hardening reviews to identify configuration gaps.
- Monitored logs, patching status, and security metrics for risk and remediation tracking.
- Prepared weekly security reports, compliance documentation, and remediation follow-ups.

EDUCATION

Bachelor of Computer Science (HONS) Cybersecurity | 3.60 CGPA

Oct 2022 - Dec 2025

Multimedia University

- Final Year Project – DocuChain: Built a blockchain document verification system using Ethereum, IPFS, React.js, and Express.js.
- Implemented smart contracts, MetaMask login, role-based access, and tested with Ganache.

Foundation in Engineering | 3.71 CGPA

Nov 2022

Pahang Engineering Matriculation College (KMKPh)

ADDITIONAL INFORMATION

- Languages:** English, Malay, Tamil.
- Certifications:** CompTIA Tech+, Red Teaming Level 0 Workshop – Oday Academy, Huawei HCIA-AI V3.5 & HCIA-Security V4.0 under Huawei ICT Strategy
- Security Skills:** Web/API Penetration Testing, Vulnerability Management & Triage, CVSS v3.1, OWASP Top 10 & API Top 10, CIS Benchmarks, Privileged Access Management, Server Hardening
- AI Security Skills:** LLM-assisted vulnerability triage, Prompt-injection awareness, Evidence grounding, AI data-handling and confidentiality controls, OWASP Top 10 for LLM Applications
- Tools:** Burp Suite, Nessus, Nmap, Metasploit, Wireshark, BeyondTrust, Git, Docker
- Technical:** Python, JavaScript, React, Node.js, REST APIs, Solidity, Linux, MongoDB, Networking (TCP/IP, DNS, VPN)
